# WHY ISCC CFC

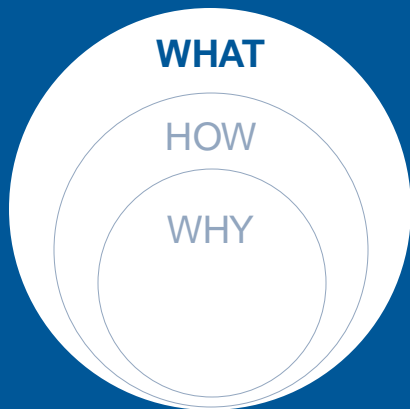

- Currently **the one and only Product Carbon Footprint (PCF) certification** (as of January 2025)
- Covering PCF of a diversity of products
- Transparent, reproducible and standardised
- Methodologies (including standardised assessment requirements and rules) publicly accessible
- Third-party verified and certified
- Following existing norms and guidelines such as ISO 14040/44/67, TfS, GHG Protocol
- Answers the increasing demand for a standardised and comprehensible PCF methodology from industry, politics and science
- Annual audit and recertification
- Combination of mass balance (ISCC PLUS) and carbon footprint (ISCC CFC)

# HOW ISCC CFC

- Development started in 2023
- Pilot projects (close cooperation with Meo Carbon Solutions, system users, and certification bodies/auditors)
- Add scope-specific requirements on PCF calculation to increase reproducibility and comparability of PCF results – increase standardisation compared to e.g. ISO
- Feedback loops for methodologies with system users, stakeholders and within the GHG working group of ISCCs stakeholder committee on Circular Economy and Bioeconomy
- Basis always PCF / LCA – specialties on e.g. mitigation or adaptation aspects reducing the PCF

# WHAT ISCC CFC

- Verification and standardization of PCFs
- Including sustainable (e.g. ISCC PLUS certified) and conventional feedstock
- Publicly accessible and commentable methodology
- Strong cooperation of system users, auditors and development team

# ISCC CFC – How to get certified (within a pilot project)

1

Communicate  
your interest in  
ISCC CFC

2

Explain and show  
your product(s)  
and value chain  
Provide or get the  
PCF calculated  
and get it  
reviewed

3

Support the  
methodological  
development

4

Contact your  
CB

5

Audit  
& Certificate

6

Publication of the  
methodology

## Development 2025 and ahead

- Renewable energies
- Recycling/circularity/ EoL approach
- PLUS-CFC combination
- Biogenic carbon accounting
- CFC Training
- Strengthen presence in scientific conferences

# Thank you!
