

ISCC EVENTS SPONSORSHIP STAKEHOLDER MEETINGS & CONFERENCES

Founded in 2010 through a multi-stakeholder initiative, the **International Sustainability and Carbon Certification (ISCC)** is a globally applicable and leading certification system designed to enhance traceable, sustainable, deforestation-free, and climate-friendly supply chains. ISCC certifications are widely recognised and cover sustainable agricultural biomass, biogenic wastes and residues, non-biological renewable materials and recycled carbon-based materials. The development and implementation of different certification standards is ISCC's tool to promote its mission to mitigate climate change and bring more traceability into global markets and supply chains.
